

Pomfort is looking for a young professional as an addition to our team:

SOFTWARE-DEVELOPER / FULL-TIME (f/m) in the area of workflow-solutions for digital movie productions

Location Munich city center
Period As of now, indefinite
Application deadline August 31st, 2011

About Pomfort

Pomfort is a young and innovative software company developing workflow solutions for digital movie- and TV-productions. Pomfort supports productions with applications for a wide range of platforms, including Mac OS X, iOS, Windows and Embedded Systems.

Your assignment

- Development of software components for our product line "Silverstack" with Objective-C
- software and architectural design of distributed and mobile systems
- Requirements analysis and planning of future products

Your skills

- Bachelor or master's degree in computer science or any comparable degree
- Practical experiences as intern oder working student
- Excellent knowledge about object-oriented programming
- Deep understanding of software design and software architecture
- Good communication and teamwork skills
- Self-reliant and pragmatic mindset

This may help

- Experiences in designing and implementing software project on Mac OS X
- Interest in movie editing applications
