

READY TO SHAPE THE FUTURE OF FILM PRODUCTION TECHNOLOGY?

Join Pomfort Software as:

Software Developer (m/f/d) for Mac Software in the Field of Film Production Technology

Location: Munich or nationwide Germany (remote)

Start Date: Immediate

Pomfort is a leading developer of software solutions for the global film industry. Our innovative desktop software and cloud services are tailored to professional filmmakers' needs and enable efficient workflows from the film set through to post-production. From cinema blockbuster to Netflix series, commercials, and documentaries - Pomfort Software helps bring stories to life.

To keep shaping the future of film production technology, we are looking for you! As a member of our international and highly agile development team, you can immerse yourself in the world of professional film production technology and quickly implement your own ideas.

POMFORT SOFTWARE IS THE GLOBAL STANDARD ON FILM SETS FOR:

- Processing of movie data on the film set in connection with high-end cameras such as those from ARRI, SONY, RED, Panasonic or Phantom.
- Color correction and quality control of live images on reference monitors instantly visualizing the artistic intent of Directors and Camera Operators.
- Preparation and deployment of the original film data and essential metadata for the subsequent post-production steps in editing, visual effects, and color correction.
- Creation (transcoding) and distribution of color-corrected clips for playback on standard players used by the production team.

CURRENT INNOVATION TOPICS IN WHICH YOU WILL BE INVOLVED

- Pomfort Software in “Virtual Production Environments” with new technological integrations, e.g. Unreal Engine
- Image control on the latest on-set monitor technologies such as HDR (High Dynamic Range) and 8K resolution
- Embedding AI technologies to automate color correction and camera matching
- Development of optimised graphic shaders for our color correction system based on Metal and OpenGL
- Framework for exchanging and uploading comprehensive libraries of clip metadata from the desktop applications into our cloud system via REST-API

YOUR QUALIFICATIONS AND EXPERIENCE:

- Professional experience in software development
- In-depth knowledge of at least one object-oriented programming language (e.g., C ++, Java, Objective-C, Swift)
- Excitement for working with new technologies
- Strong communication and team-working skills
- Independent and solution-oriented way of working

Helpful additions: Experience with Objective-C or Swift on mac or iOS, experience with user interface development or image processing, interest in film production processes

WHAT MAKES WORKING AT POMFORT UNIQUE:

- You develop multi-layered and innovative software solutions with high design and quality standards that are enthusiastically used by filmmakers worldwide.
- You can expect a lively and fresh work culture with flat hierarchies and fast decision making processes in agile project teams.
- You will work in a well-equipped working environment in our local office in the center of Munich, or you can also decide flexibly whether you would like to work from your current place of residence (remote)
- If you wish, you have a wide range of options for optimizing your salary, such as subsidies for commuting expenses, meal vouchers or job bike leasing.

APPLICATION

Sounds like your next career step?

Then we're looking forward to receiving your meaningful CV by e-mail (written in English or German) to:

Alexander Sahn, Head of Software Development
hr@pomfort.com

Pomfort GmbH Nordendstr. 3
80799 München
